PRODUCT DESCRIPTION

Designer: Raimond Puts

Moooi Raimond II Dome LED Pendant

The Raimond II Dome pendant was designed and named after Raimond Puts. Puts was fascinated by the geodesic dome and was curious about the prime numbers. The Raimond II Dome reflects both those passions, with a hemispherical shape and dimensions that reflect prime numbers (like the 79 cm diameter). Puts spent years experimenting with different materials and shapes, trying to create geometric objects. With time came refinement, and together with the technological improvement of LED sources, Puts was more productive than ever. His work consistently combined functionality and beauty, with minimal design and maximum functionality.

Raimond Puts will forever be remembered as the man who brought the night sky into our homes. Small LED units are scattered across the stainless-steel frame, resembling the soft glow of a starry night. Install the Raimond II Dome above a dining table, in the living room, or in a reception area. Alternatively, create a unique cluster of lights by displaying with different models available in the [Raimond II collection](#).

Please note: These lights are not dimmable via standard mains phase dimming. However, a Moooi wireless dimming switch is available to purchase separately, enabling you to dim your Raimond II fitting without the need for additional wiring. The Wireless switch comes with a dimmable module that is fitted inside the ceiling canopy. [Contact us](#) for more information.

PRODUCT SPECIFICATION

Light Source: 23W, 2500K, 1331 Lumens

IP Code:

20
