PRODUCT DESCRIPTION

Designer: Jordi Canudas

Marset Dipping Light LED Pendant Light

Marset Dipping Light LED Pendant Light is a coloured glass pendant by Jordi Canudas, available in several smaller sizes within the Dipping Light collection. Each pendant uses a glossy blown glass globe with layered paint, a polycarbonate cover, and a black suspension cable. The painted layers form rings across the glass, so the shade changes the way the light is seen rather than acting only as a coloured finish.

The smaller pendants work well where colour is needed at a more modest scale. Dipping Light 13 can sit beside a bed or in a small corner, Dipping Light 20 works well over small tables and counters, and Dipping Light 30 gives more presence over dining tables, kitchen islands, seating areas, and open-plan spaces. They can be used alone or repeated where several glass pendants are needed in a row or group.

Each version is hardwired, supplied with a black electrical cord and black canopy, and includes an integrated LED with Triac dimming through a compatible system. The standard finishes are White, Green, Amber, Burgundy, Chocolate, and Cream. Most suited to bedrooms, dining rooms, kitchen islands, living spaces, restaurants, hotels, and interiors where one or more coloured glass pendants can provide warm, filtered light.
