PRODUCT DESCRIPTION

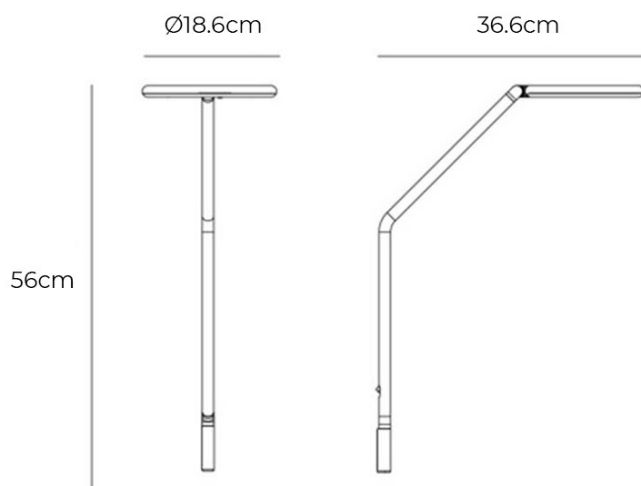

Designer: BIG

Artemide Vine LED Wall Light

Designed by BIG, the Artemide Vine LED Wall Light is a larger and more interactive version of the [Vine Spot Wall Light](#). The structure consists of an unbroken black line, which conceals all of the technological complexity and innovative research within a 2.5cm diameter. The head of the silhouette is fitted with LED technology, which creates a functional illumination that can be dimmed via the button on the product.

The Artemide Vine Wall Light prides itself on its interactivity, harnessing two joints which allow you to manoeuvre the light source and personalise the direction. This makes Vine perfect for both task lighting and ambient lighting. The Artemide Vine Wall Light protrudes away from the wall, creating a functional lighting solution for workspaces, a reading light in living areas or for illuminating areas in the hospitality sector, such as restaurants and bars.
