CTO Lighting Array Table Lamp

The CTO Lighting Array Table Lamp is a perfect union of contemporary design and retro sophistication. Inspired by the elegance of 1960s Italian aesthetics, this table lamp features a sculptural form with rotating arms and adjustable opal glass shades. Available in single or twin-arm configurations, the lamp offers flexibility in light direction, making it an excellent choice for desks, bedside tables, and sideboards. The opal glass shades diffuse light evenly, creating a soft and warm ambience that enhances the comfort of any space.

Crafted with precision, the Array Table Lamp is built from hand-finished bronze with satin brass or bronze details, ensuring both durability and understated luxury. The heavy, machined brass base adds stability and a touch of glamour, while the inline dimmer allows you to adjust the light's intensity with ease. Whether used as an ambient light source or a functional task lamp, the Array Table Lamp stands out as a timeless piece of British craftsmanship.

This versatile lamp is available in two sizes to suit various interiors. The single-arm version is ideal for compact spaces or accent lighting, while the twin-arm version provides greater reach and illumination for larger settings. With its combination of high-quality materials and thoughtful design, the Array Table Lamp brings a refined yet approachable elegance to modern interiors.
