PRODUCT DESCRIPTION

Designer: BIG

Artemide Architectural Alphabet of Light System

Alphabet of Light is a precise, modular LED system that lets you compose space with lines and arcs of soft, continuous illumination. Linear elements in 600, 1200 and 1800 mm pair with curved segments at 22.5°, 45°, 60° and 90°, plus X and T junctions and dedicated vertical pieces. The slim profile reads cleanly in plan and section, while the opaline diffuser delivers calm, low-glare light for circulation, meeting and dining areas. Powered and non-powered modules, terminals and semi-recessed options make planning and installation straightforward.

The system supports suspension or wall and ceiling mounting and is offered at 3000K or 3500K for a warm or neutral white scheme. Output scales with length and geometry, from small connectors at 105 to 253 lumens to linear runs at up to 3400 lumens per segment, allowing both intimate ambience and strong functional light. Use single gestures over counters and islands, trace routes through lobbies, or build larger compositions that become the identity of a room. Dimming control is project dependent, please confirm 1-10V or DALI per module before specifying.

As the official UK distributor, we can support you with the Artemide configurator and specification. Please note, as this product listing refers to a system with a range of possible configurations the price shown may differ from the final quote. Contact us at artemide@davidvillagelighting.co.uk for further information.

PRODUCT SPECIFICATION

Light Source:	Available in 3000K or 3500K colour temperature. Wattage and lumen output vary by luminaire type.
IP Code:	20
Dimming:	Available with DALI, Push to Make or App dimming compatibility. Please consult your electrician, additional wiring may be required on site.
Dimensions:	Multiple options are available. Contact us for more information.
