PRODUCT DESCRIPTION

Designer: Boris Klimek

Brokis Under Pressure LED Pendant Light

A striking design by Brosi Klimek, the Brokis Under Pressure Pendant adds an industrial touch to a variety of interiors. Inspired by the fleeting moment when molten glass becomes a solid object, this luminaire brings geometric regularity to your space, offering numerous shapes, sizes and finishes, allowing you to create custom configurations that suit your needs and interior style. Each Brokis Under Pressure Pendant is crafted from glass with metal detailing. Both of which can be mixed and matched in various finishes, offering a variety of combinations. The glass can also be provided in a smooth or textured finish.

Functionality is also a key aspect of the Under Pressure lights; the luminaires also utilise two inner LED light sources, one within the glass shade and one fitted into the bottom of the stem, resulting in an evenly dispersed illumination with an added direct downlight that spreads onto the surface below. Under Pressure delivers an alluring juxtaposition of the organic malleability of glass and the uncompromising precision of metal. The lights are manufactured in assorted sizes and typologies, for a look that always catches the eye and elevates the aesthetics of any space.

Please Note: The Brokis Under Pressure Pendants are supplied as non-dimmable as standard, but can also be provided with different dimming capabilities. Please [Contact Us](#) for further information and pricing.
