The Muuto Contra Floor Lamp is a striking statement piece that brings together balance, scale, and movement. Designer Jamie Wolfond uses clever weight distribution to create a large, sculptural floor lamp that is easy to adjust. A cement base supports the slim curved frame, providing stability while preserving a sense of visual lightness. The lamp's height can be adjusted from approximately 30cm to 260cm from the ground, while the base allows for sideways rotation for multiple positioning options. With its impressive scale and intuitive movement, the Contra is a striking statement piece that invites interaction.

The spun, powder-coated aluminium shade houses a user-replaceable LED and directs light downward when switched on, making it ideal for task lighting. With its grand scale, the Contra offers an alternative to a pendant light when positioned above a sofa or table, creating an atmospheric glow that is perfect for reading. An integrated dimmer on the frame makes it easy to adjust the brightness to suit any mood.
