PRODUCT DESCRIPTION

Designer: Box Arkitekter

Orsjo Belysning PJ71 Wall Lamp.

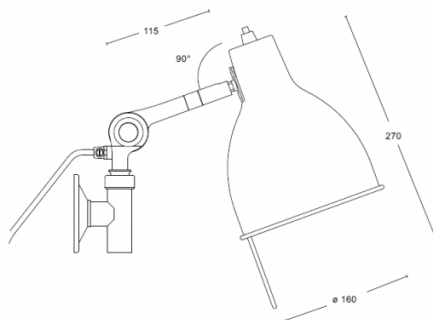

The PJ71 Wall Lamp is a functional and adjustable wall light, used for both home and public spaces. Ann Morsing and Beban Nord at Box Arkitekter were inspired by the work of PeFeGe Eriksson when developing the PJ collection, they have updated the classic 1940's industrial lamp to meet modern day needs. The PJ71 is still as practical and elegant as it was over 60 years ago but now with the enhancements of modern day technology.

Unlike the other wall lights in the PJ collection, it boasts a smaller and more subtle design. Yet this does not effect the adjustability. The PJ71 still offers the benefits of extensive movement, granting you the ability to create a direct light source, making it a perfect task light. Due to its size and mounting options, the PJ71 also has the benefit of saving space, making it perfect for those smaller workspaces or home offices where you lack desk space.

The PJ71 is available with a 250cm black cord, plug and wall attachment, or is suitable to be hard wired.

The purpose of these task lights is to create a comforting direct light that is perfect for workspaces without being too clinical or harsh. And this is why the PJ collection soon became an office classic. [Explore the PJ collection today.](#)
