PRODUCT DESCRIPTION

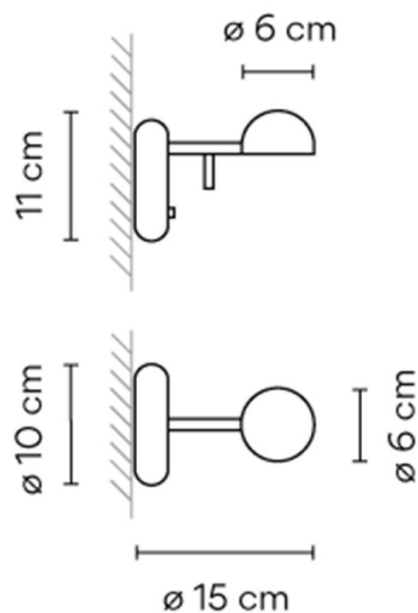

Designer: Ichiro Iwasaki

Vibia Pin LED Wall Light

The Vibia Pin LED Wall Light is a subtle lamp with a light beam whose main function is to supply sufficient light for reading. This wall light was designed by Ichiro Iwasaki for Vibia, made from high-quality materials and provides the ability to adjust the lamp head and therefore the direction of the illumination. This action allows you to choose between a direct glow that resembles a task light or an indirect light that provides a more ambient environment. Vibia Pin features a polycarbonate diffuser which, no matter which direction you choose, results in a soft and glare-free glow that provides functionality without causing any harshness.

The Vibia Pin LED Wall Light can suit a wide range of interiors and personal styles thanks to the various colour finishes. Choose between Black, Cream, White or Green, all with a matte finish. This wall light is a great addition to bedsides as well as living spaces and reading nooks.
