PRODUCT DESCRIPTION

Designer: Arik Levy

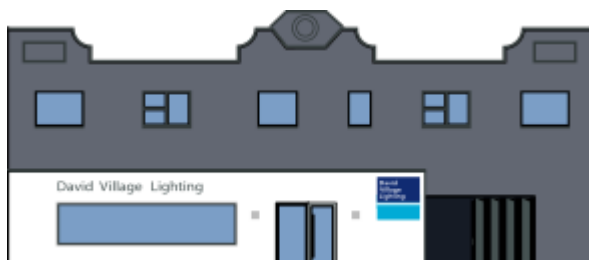

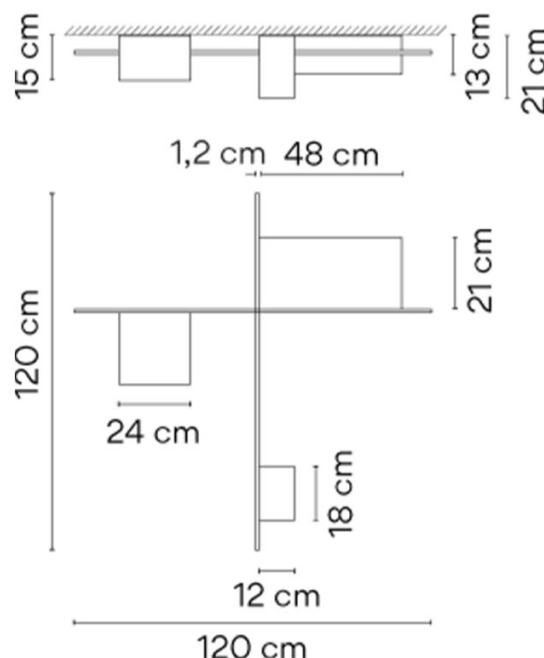

Vibia Structural 2645 LED Ceiling Light

Designed by Arik Levy, the Vibia Structural 2645 LED Ceiling Light is the largest in the collection. The silhouette combines sleek metal rods and aluminium boxes which house the LED light sources. These box diffusers assist in creating both indirect and indirect illumination, not only creating fun plays of light on the ceiling but also casting an even glow across your room.

This contemporary ceiling Light remains unobtrusive despite its size and is just as stunning turned off as it is when illuminating - replicating a piece of art on your wall and guaranteed to catch the eye of you and any visitors. Available in two industrial finishes, the Vibia Structural LED Ceiling Light can fit into a range of modern interiors, for both residential and commercial areas.
