PRODUCT DESCRIPTION

Designer: Ilia Sergueïevitch Potemine

ISP LED Table Lamp by DCW éditions

Designed by Ilia Sergueïevitch Potemine, the ISP table lamp is a truly unique and one-of-a-kind light, a mysterious and intriguing object that will draw the eye in any interior. This table light looks towards the future, shirking any previous notions of lighting design to produce a thoroughly original concept.

The ISP table light is made from a beautiful brass capsule that holds the LED light source inside, sat atop a black marble or white marble base. The table lamp is switched on as the user opens the capsule and pulls out the light, being a mechanical marvel that will wow and amaze. The ISP can be used in many spaces to provide a welcoming and useful illumination and will be a talking point in the room. Contemporary and yet timeless, a true jewel of lighting design.
