PRODUCT DESCRIPTION

Designer: Verner Panton

Verpan Wire Floor Lamp

The Verpan Wire Floor Lamp was designed by Verner Panton with the aim of challenging the status quo of mainstream design. This modern floor lamp features a cylindrical wire framework that widens into a hemisphere at the top where a hemispherical white plastic shade delicately sits. This plastic shade creates a soft ambient light which is perfect for a hallway, study or dining area.

The futuristic design of this simplistic floor lamp makes it suitable for multiple interiors as Verpan describe this lamp as being 'super versatile'. This Verpan design also comes as a table lamp, paired together, the [Wire collection](#) would add a soft yet industrial feel to any space.
