PRODUCT DESCRIPTION

Designer: BIG

Gople Mini Table Lamp by Artemide

The mini version of the [Gople table lamp](#), the Gople Mini is the latest addition to the Gople family. Designed by BIG (Bjarke Ingels Group) for Italian manufacturer, Artemide, the Gople design attracted attention when first introduced to us in 2018. The Gople Mini Table Lamp features the characteristic blown glass diffuser with a metallic finish. The diffuser is made following an ancient Venetian technique, where the blown glass slowly transforms into blown glass. The metallic finish is achieved using a technique called vacuum metalisation. This process creates very little waste and is the most environmental friendly considering the metal types used. The glass finish ensures the maximum relationship with the light; hiding the light source but emitting a direct emission via transparency.

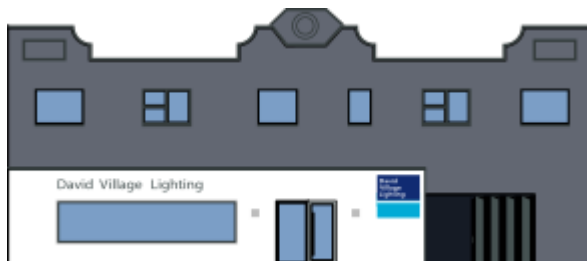

The Gople Mini table lamp, stands at 34 cm high, and has an inline on/off switch on the cable. Available in 5 colours to choose from; blue sapphire, bronze, copper, silver or white which can be paired with a black, silver or white base. The lamp can be placed on a side table, coffee table, nightstand, desk, table; the perfect lighting solution for both residential and commercial projects, as well as in hospitality. Take a look at the entire Artemide [Gople Collection](#), and select the light that will suit any interior, guaranteed to create a unique atmosphere.
